THE PINNACLE PRACTICE MANAGEMENT SOFTWARE

Version 9

Sunrise Services LLC
888-880-0384

IS YOUR OFFICE BURIED UNDER PILES OF PAPER?

IS YOUR STAFF WASTING VALUABLE TIME LOOKING FOR LOST CHARTS?

Immediate access to a patient's medical records is essential to quality medical care and can mean the difference between the life and death of a patient. Electronic Health Record (EHR) systems, used by physicians' offices in ambulatory care settings, make patient history readily available in those critical moments.

EMR Software Overview

AltaPoint Practice Management Software with EMR (Patient Records) provides a host of innovative tools to **improve both office and clinical efficiency, while helping to improve quality of care.** Patient Records allows practices to replace their paper charts, with a comprehensive feature set utilized nationwide by medical offices of all sizes and specialties.

Since its introduction in 1997, **AltaPoint EMR** has focused on what we know best - outpatient medical clinics. Refined by over a decade of feedback from active users across the country, Patient Records is designed to automate both the clinical and business sides of the modern medical office. The system can interface with almost every major practice management system.

In addition to the comprehensive **feature** set of **AltaPoint EMR**, **AltaPoint EMR** has a depth of experience in successfully implementing and supporting a wide variety of sites, from solo practitioners to multi-practice clinics utilizing wide area networks.

Practice Partner is the only company with more than seventeen years of experience in successfully implementing electronic medical record systems.

Why an Electronic Medical Record?

Electronic Medical Records is the inevitable next step in the continued progress of healthcare. **An EMR is one of the best business and quality of care investments that a practice can make.**

AltaPoint EMR Software -- Benefits

It is clear that a new standard is emerging for medical records. The electronic medical record is a powerful new tool for improving the quality of care and enhancing office efficiency. **AltaPoint EMR** offers a number of clinical and administrative benefits to help your practice.

Improves Clinical Efficiency, Patient Care, and Service

An EMR includes a number of features that allow the clinical side of the practice to operate more efficiently. Patient Records users enjoy these benefits from their system:

- Improves documentation quality (legible, organized, complete)
- Facilitates better patient communication
- Provides built-in protocols and reminders (including health maintenance)
- Improves medication management
- Enhances efficiency of signing of charts

Reduces Costs

The productivity and efficiency gains of an EMR translate into lowering the hard dollar cost of running a practice. Practice Partner customers report these as some of their cost benefits:

- Reduces transcription costs
- Lowers labor costs
- Reduces internal/external copying expenses
- Lowers malpractice insurance costs
- Reduces pharmacy costs

Enhances Revenue

In addition to substantial cost savings, an EMR can positively impact the top line of a practice in a number of ways:

- Improves the completeness of documentation
- Improves coding accuracy
- Increasing the number of services offered
- Boosts the number of visits per day

Boosts Administrative Efficiency

Successful EMR sites are more efficient than traditional offices. As a result, the number of FTEs required to support physicians is lower than at paper based offices. **AltaPoint EMR sites report 2.0 to 2.5 FTEs per doctor (schedulers, nursing and billing), compared to the MGMA average of 4.0.** These improvements can be attributed to the following:

- Reduces chart pulls and less filing

- Allows universal access to the chart (by more than one person at a time)
- Eliminates time spent searching for lost charts
- Reduces phone tag with patients
- Improves internal office communication
- Reduces call-backs from pharmacies
- Improves compliance with chart requests and chart audits

AltaPoint EMR -- Features

AltaPoint EMR provides a comprehensive feature set, coupled with a friendly and intuitive interface. This results in an EMR system that is powerful enough for any office, yet **easy-to-learn and easy-to-use**. Here is a sample of just some of the features contained in Patient Records:

Complete Electronic Medical Records system (EMR)

- Open multiple charts at the same time
- User-definable chart summary field
- Allows you to take the EMR out into the field and Sync it into the main computer with no loss of current data

Progress Note Functionality

- Documentation by: free text, pre-defined, or user defined clinical templates, and/or dictation
- Automatic updates on different sections of chart
- Review allows providers to review unsigned notes, incoming lab data, reports, and letters
- Easy attachment of images to notes
- Electronic signature documents author of progress note

Prescription Writer

- Over 700 prescription templates provide dose, alternatives, and prices for the prescribed medication
- Drug interaction and automatic allergy/intolerance checking 3 medication lists: Current , Ineffective, Historical
- Formulary checking
- Fax prescriptions from Patient Records directly to the pharmacy

Health Maintenance

- Overdue health maintenance reminder
- Vital Signs data capture

Laboratory Data

- Lab data can be imported from outside or in-house lab using industry standard formats (ASTM1238, HL7)
- Abnormal data flag
- Practice Partner has built hundreds of lab interfaces to such labs as LabCorp, Quest Diagnostics, Cerner and Labdaq

Messaging

- Intra-office messaging
- Chart info can be e-mailed to consulting physicians

Reporting

- Missing progress notes
- Unsigned progress notes
- Unsaved progress notes
- Print chart summary
- Print complete patient chart
- Print note by: provider and date all notes

Why AltaPoint Practice Management Software & EMR...

AltaPoint EMR provides a host of innovative tools to improve both office and clinical efficiency, while helping to improve quality of care. Patient Records allows practices to replace their paper charts, with a comprehensive feature set utilized nationwide by over 3,600 medical doctors of all specialties.

Top Reasons for AltaPoint EMR Suite

- Developed by a doctor for doctors
- Integrated database for EMR and billing modules
- Two-way interface with labs
- Integrated fax software
- Local & Long Distance installation, training and support by Sunrise Services
